

How AI has impacted blue & white collar workers diff.

White collar

A jobs that can work remote
are more likely to AI exposure

CBS-

Pos
potential to create jobs

Neg

"Software & coding jobs are the most exposed to replacement by AI" an analysis from indeed
"95% of the skills these jobs require" ~~with~~ ^{gen AI} was created to

(software development information technology mathematics
info. design. legal & accounting positions are exposed

blue collar

CBS- truck & taxi drivers are least likely exposed to AI
only 30% of the required skills could be accomplished
by generative AI, According to Indeed

cleaning & sanitation beauty & wellness
being as they aren't commonly referred to as remote work

(summary-
+ future)

"AI is unlikely to fully replace humans
in areas where they excel."

"may ^{replace} ... workers ... whose jobs
are automatic/mindless... by heart

Generative AI can carry the load ^{work} ^{reducing} needed
personnel ~~from~~ ^{turning} the personnel shrinks.
when

focusing on
productivity
